

Venkata Profile

Technology & Project Management Leader | ATMS • MLFF • TCMS • ITS

Professional Profile

Technology and project leadership across Intelligent Transport Systems, tolling, system integration and enterprise technology delivery, with responsibility spanning project planning, execution, stakeholder coordination and operational readiness.

12+	35+	15+	7+	6+
Years of IT & ITS Experience	Technical Support Team Members Led	Toll Plazas Maintained	End-to-End Projects Executed	ATMS Projects — End-to-End PM & Execution

Core Leadership Areas

End-to-end project management and technology delivery • ATMS, MLFF and TCMS project leadership • System integration, deployment, testing and commissioning • Client, vendor and stakeholder management • Project scope, schedule, risk, quality and issue management • Technology strategy, infrastructure and operational readiness

From RFP to Execution

RFP & Tender Management — Technical participation in RFPs and tenders, including requirement analysis, compliance mapping, technical responses and bid inputs.

Solutioning & Architecture — Practical technology solutioning aligned with project requirements, operational needs, integration and implementation constraints.

Costing & BOQ — Project costing, estimation, Bill of Quantities preparation, technology/infrastructure sizing and techno-commercial inputs.

Contracts & Commercial Coordination — Contract scope definition, commercial coordination, vendor discussions, deliverables and execution requirements.

End-to-End Project Management — Leadership from planning and mobilization through procurement, integration, testing, commissioning, handover and operational support.

Technology Focus

ITS & Tolling: MLFF, ATMS, TCMS, ETC, ANPR, RFID, CCTV, VMS

Project Delivery: Project Management, System Integration, Testing, Commissioning, Stakeholder & Vendor Management

Commercial: RFPs, Solutioning, Costing, BOQs, Contracts

IT: Linux, Windows, Servers, Networking, Infrastructure, Cybersecurity

Career Positioning

Associate General Manager – Systems & IT, with a career spanning IT operations, technical support, systems engineering and leadership of large-scale technology and ITS deployments.
